Review FESI spring meeting

Contractor's associations gather in Berlin

This year's spring meeting of the European contractor's association was held in the German capital Berlin. EiiF was present at this meeting and reported on its progress. During the meetings, nominations were made for the next generation of FESI leadership.

Following this, and from 1 January 2013 onwards, EiiF Foundation Director Andreas Gürtler will be stepping in to take over as the Secretary General of FESI. This will give FESI a permanent line of contact. This closer cooperation will surely strengthen the synergies between the two organisations.

Championship winners & FESI leadership; Marita Björklund (FESI Vice-president), Peter Hoedemaker (FESI President), Szymon Pikul, Artur Stabel, Frederik Møller-Hauge and Helmut Bramann (FESI Member & event host)

Alongside the scheduled meetings, FESI organised the bi-annual championship for young industrial insulators. The competition took place at the Bautec exhibition, between 12 promising young professionals from 11 countries. EiiF congratulates all participants for their high-quality performance and particularly Artur Stabel as the winner of this edition.

TIPCHECK engineers reporting

Almost 30 engineers certified with more coming

The TIPCHECK Programme is now well on its way, with 29 engineers having been certified. You can find out who they are, and where they are situated on the EiiF list of certified TIPCHECK engineers, available through our website.

Another 10 engineers will follow the training course from 27 to 30 March in Rouen, France.

TIPCHECK

Meanwhile, the first TIPCHECK projects are also being organised. The first pilot project took off late last year, where TIPCHECK engineers were contacted by SABMiller.

More information on this project will follow in our next newsletter.

Find your closest TIPCHECK engineer quickly on eiiF.org:

<http://www.eiiF.org/?Certified%20engineers/46>

Already, the Programme is gaining momentum and EiiF is being approached by clients who have heard of TIPCHECK and want to find out more. We expect at least two more EiiF TIPCHECKs to be started during this year. The first company TIPCHECKs are also being organised.

All TIPCHECK results will be gathered in the yearly EiiF TIPCHECK report. Let's see who can reduce unnecessary energy loss the most...

Discuss your TIPCHECK experiences on LinkedIn:

<http://www.linkedin.com/groups?about=&qid=4283796>

Training sessions are held at regular intervals throughout the year. Courses can be made available in English, German or French. Contact EiiF for more information.

Upcoming TIPCHECK trainings on the agenda:

TWG Cold

Cold insulation working group for EiiF

On February 17th, the start-up meeting was held for a new EiiF Technical Working Group. This TWG will focus on improving the communication and awareness of industrial cold insulation and its benefits.

All meetings of this group will be open for everybody who is interested.

The TWG Cold will establish a training concept on the latest cold insulation practices & specific knowledge for current and future TIPCHECK engineers.

Communication Team prepares Ecofys launch

Fruitful meeting held in Ludwigshafen

On March 7th, the communication team met in Ludwigshafen for another successful meeting. The main topics on the agenda were the release strategy for the Ecofys study and the EiiF presence at various fairs, conferences and events this year. Keep an eye on the agenda for where to find us next!

Also, the first steps for the TIPCHECK ambassador programme were taken. The pilot session will be held on 4-5 July in Geneva. The purpose is to train communication & sales experts on the specifics of the TIPCHECK Programme.
